

## Building Product Update Meetings + 2023 Tour Schedule

The Building Products Update is a virtual meeting between an RBA Specification Consultant and an active design professional such as an Architect, Engineer, or Interior Designer who specify products in their projects. Each one-on-one meeting features a curated collection of building products showcased through Zoom® screen-sharing. Our presentations offer a clean, easy, and organized design that allows for a custom dialogue driven experience without taking hours of a designers valuable time. We tour across the US & Canada three times per year in three week scheduling blocks organized into 10 regions:
